FUND OBJECTIVE

The Alternatives and Real Assets Fund's objective is to deliver a total return through a combination of capital growth and income over the long term (5 years+). It also aims to provide a diversified return profile when compared against traditional global equity and global fixed interest markets. It aims to do this by investing in assets which provide exposure mainly to alternative strategies and/or real assets worldwide.

FURTHER INFORMATION

- The investment team regards 'alternative strategies' and 'real assets' as those asset classes which are complementary to traditional global equity and bond investments. This may consist of certain 'niche' asset classes or sectors, such as investment strategies which are intended to generate a positive return, even when markets are volatile, flat or falling, or investments in the real estate, commodity or infrastructure sectors.
